

verno™ Cu30+Zn30

Onions

Water-dispersible and dust-free granules for the correction of copper and zinc deficiencies. VERNO Cu30+Zn30 contains micronized particles of copper oxide and zinc oxide that adhere strongly to plant surfaces. These particles serve as a slow-release copper and zinc reservoir that is easily accessible to the plant.

NUTRIENT CONTENT

Copper	as dicopper oxide, Cu_2O	300g/kg
Zink	as zinc oxide, ZnO	300g/kg

INSTRUCTIONS FOR USE

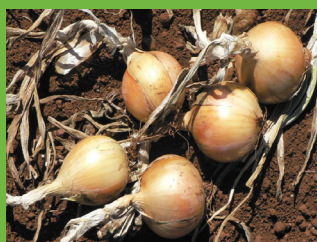

Use 200 - 500 g/ha per treatment at BBCH 13-14 (3-4 leaves), BBCH 17-18 (7-8 leaves), and BBCH 43-44 (3-5 cm bulb diameter). Multiple low-dose treatments are most effective. Read the label before use.

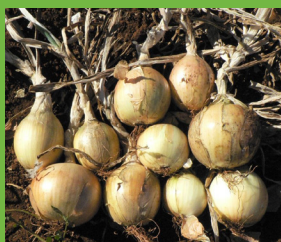

FIELD TRIAL RESULTS

10+ years of onion field trials conducted in Australia, Africa, South America, and Norway show:

- > 3000 kg higher marketable crop per hectare!
- Smaller neck diameter, provides better storage
- Thicker skins and better color
- Excellent return on investment

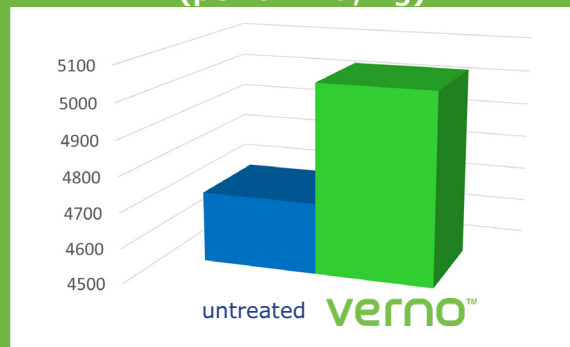

verno™ 500 g/ha

untreated

Marketable Onion Harvest (per 0.1 ha; kg)

verno™ boosts onion yields!
